**DETAILED ACTION*****Specification***

The disclosure is objected to because of the following informalities: It is the Examiner's position that Applicant has evoked sixth paragraph, means-plus-function language to define Applicant's invention. Therefore the Examiner requires the Applicant to amend the specification pursuant to 37 CFR 1.75(d) and MPEP 608.01(o) to explicitly state, with reference to the terms and phrases of the claim element, what structure, materials, and acts perform the function recited in the claim element. Please note that the MPEP clearly states, "Even if the disclosure implicitly sets forth the structure, materials, or acts corresponding to the means- (or step-) plus-function claim element in compliance with 35 U.S.C. 112, first and second paragraphs, the PTO may still require the applicant to amend the specification pursuant to 37 CFR 1.75(d) and MPEP 608.01(o)...". (Also see **MPEP 2181** (Rev. 1, Feb.2000))

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 24 recites the limitation "the medial and lateral straddling members." There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 3763

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21, 22-26 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by McClure U.S. Pat. No. 4,512,040.

McClure discloses an ocular apparatus comprising: a housing member (10) configured to be at least partially placed beneath one of the upper and lower eyelids, and directly adjacent an eye of a patient; a medicament containment member associated with the housing (20); a handle member being operably connected to the housing (28 and 30); wherein the housing member in combination with the handle member cooperate with a corner of the patient's eye to maintain registered placement of the ocular apparatus (fig. 1), furthermore, the device of McClure is fully capable of performing the function of being cooperative with the corner of the patient's eye; as to claims 22, (portions of 28 and 30); as to claim 23, (any portion of 28 and 30 other than the aforementioned portions) 24-26, (fig. 1); as to claim 29 (fig. 1).

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 3763

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 21 and 30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,319,240. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim a housing for placement under eyelids; medicament container; handle and electrical communication with the containment member.

### ***Response to Amendment***

#### ***Specification***

Applicant should provide proper antecedent basis for the means plus function along with the specific structure, materials, and acts, which perform the function, recited in the claim. The objection will be maintained until applicant is compliant.

### ***Response to Arguments***

Applicant's arguments with respect to claims 21-26 and 29-30 have been considered but are moot in view of the new ground(s) of rejection.

As to claim 21, the examiner clearly regards (28, 30, 54 and 56) as the handle member in cooperation with the corner of the patient's eye to maintain registered placement of the ocular apparatus.

Art Unit: 3763

*Conclusion*

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
